

COMMUNITY GARDEN SALVATION ARMY - KNOXVILLE, TN

The Salvation Army is a non-profit organization devoted to helping people get through the most challenging of times. By helping children have a brighter future, feeding hungry families, and helping people regain hope after a disaster strikes, they make a huge difference in the community.

CDC with the help from Volunteer Garry Menendez, Landscape Architect, developed a plan for a Community Garden in a space between two existing buildings at Salvation Army's facility on Broadway. This garden will provide a place for their clients to focus their energy on a project that should bear great fruit.

The design of the community garden included the addition of raised planting beds, seating areas, a greenhouse, an outdoor art wall to be completed by volunteers, and the integration of a rain-water collection system.
