

## URBAN WILDERNESS & HISTORIC CORRIDOR

Legacy Parks enlisted the aid of CDC and Landscape Architect volunteer, Sean Vasington to help them identify the existing greenspaces in South Knoxville and develop potential connections between these amenities.

ETCDC mapped 1,000 acres of greenways, trails, parks, civil war forts, and other public amenities and developed potential future connections between these areas.

This plan was highlighted at the 2009 Mayor's Luncheon and can provide a roadmap for any future development south of the river to ensure that public greenspaces are of primary importance for the citizens of Knoxville and Knox County.
