

EMORY VALLEY ADULT DAY CARE CENTER EXPANSION - OAK RIDGE, ANDERSON COUNTY, TN

The Emory Valley Center located on Emory Valley Road in Anderson County serves individuals with developmental disabilities. Their programs are housed in two separate facilities that are isolated from each other by a 4-lane highway.

The CDC with help from architect volunteer Manny Herz, developed a new facility to consolidate and better accommodate their programs on their property. The new building includes classrooms, workrooms, a kitchen, conference rooms, a medical and rehab area, and administrative offices. These rooms surround a courtyard space designed for activities and socialization. It's sheltered, easily supervised and provides addition daylighting to the surrounding rooms. The design also provides room for future expansion to the south.
