

**THE FUTUREScape of PITTMAN CENTER - SEVIER COUNTY, TN**

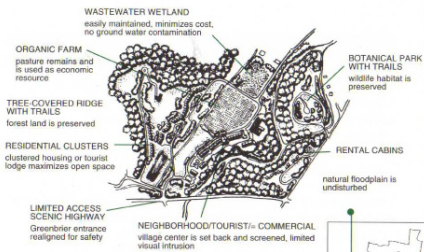

ETCDC partnered with TVA to create a sustainable plan for the future development of Pittman Center, which would preserve their mountain heritage, their scenic and natural assets, and their networks of family and social relationships. The team analyzed the existing area and developed guidelines to ensure that all future development would contribute to the values embraced by the people of the area. These sketches and renderings illustrate some of the recommended concepts.
